Brgy., Sto. Domingo, Urdaneta Pangasinan

# HISTORY

Unimax Steel Resources, Inc. (USRI), started in 2017 as coils importer and distributor, prepainted roofing manufacturer, and structural decking supplier.

Our initial product portfolio was comprised of three(3) profiles of prepainted roofing, two(2) profiles of structural steel decking and C-Purlins. We imbue the customers' trust and demands. With the steadfast customer growth we've seen, we added Sierra Tile Roof and Spandrel to our product portfolio in May 2019. Our aspiration for growth has led us to establishing a new location, thus materializing what was once a vision. In 2020, Unimax Pangasinan opens its doors to deliver products and services to our loyal clients in Northern Luzon.

*In less than half a decade, we have already demonstrated our philosophy towards our people, products, and services. We are optimistic that we will gain maximum growth and service in the Philippine Steel Industry.*

## Our Mission

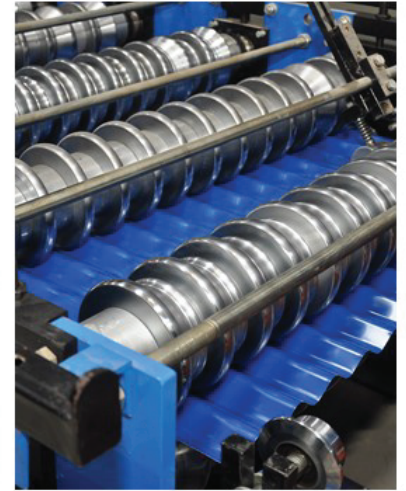

We at USRI are on a mission to run along and even above the names in the Philippine Steel Industry by providing consistently strong, swift, and reasonably priced materials and services.

## Our Vision

In the next years, Unimax Steel Resources Inc. is going to be trusted name in the Philippines when it comes to prompt service and innovative products. In effect, our customers will be more open to ideas in building timeless structures.

# PRODUCTION

## ROOFING

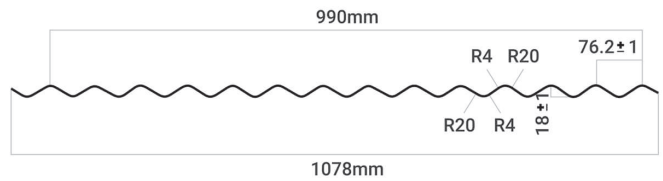

## STEEL DECKING

# OUR PRODUCT ROOFING

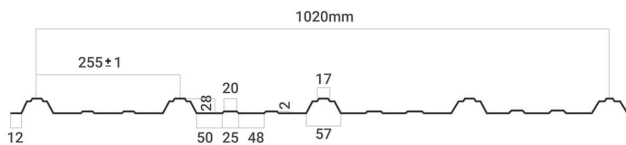

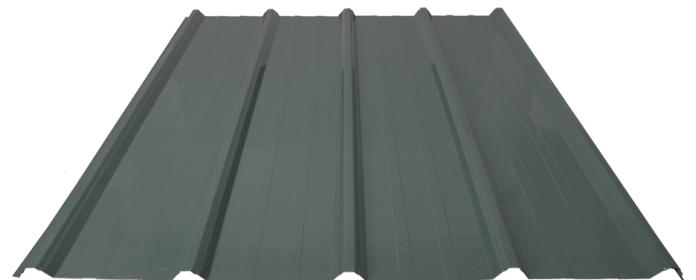

## MAXI CORR

Maxi Corr features classic design & conventional profile which has stand the test of times.

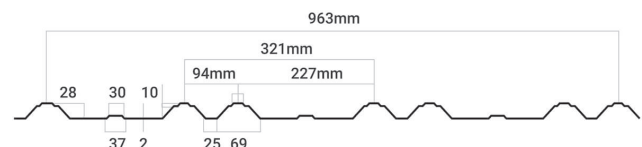

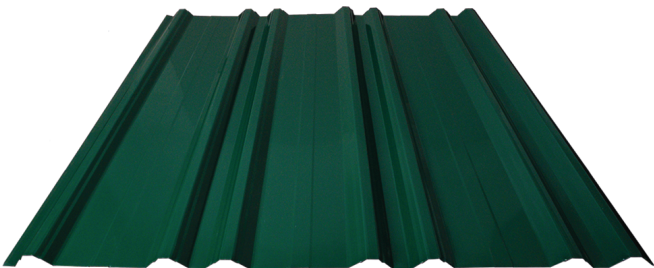

## MAXI HI RIB

Maxi Hi Rib is a versatile & practical roof and wall cladding profile with it's high crest of .28mm. The strong profile of Hi Rib combine with a high tensile steel provides for optimum strength.

## MAXI TWIN RIB

A structurally enhanced rib type roof ideal for low pitch roof corrugation. Strength and aesthetics combine for a roof that can with stand extreme weather conditions.

# OUR PRODUCT TILE ROOF & SPANDREL

## SIERRA TILE ROOF

The wave pattern profile creates a distinctive European feel. It's more lightweight and longer lasting than traditional roof tiles.

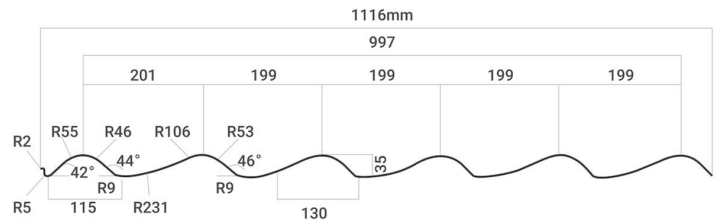

Our Tile Roof is crafted in two options:

### SIERRA MAX TILE ROOF

with a step height of 25mm.

### SIERRA TILE ROOF

with a step height of 18mm.

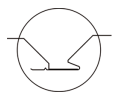

## MAXI SPANDREL

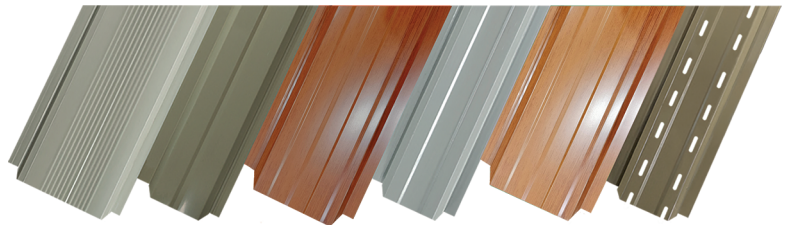

Spandrel made from a pre-painted metal sheet that is elegantly beautiful and provides a perfect finish of eaves ceilings and shades.

Maxi Spandrel ceilings:

- 4" - 152mm coil width
- 6" - 203mm coil width

Lapping

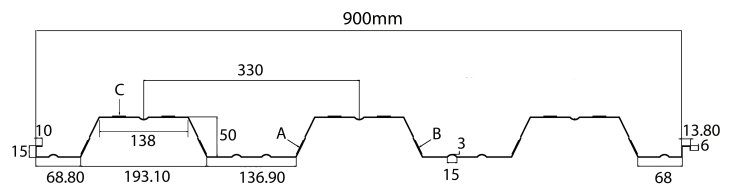

# OUR PRODUCT STEEL DECKING

## MAXI WEBDECK

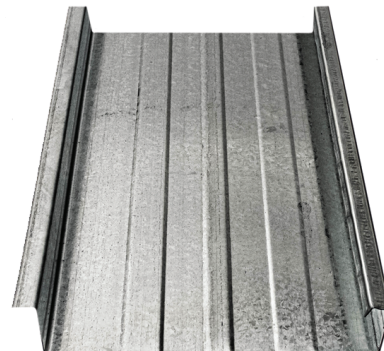

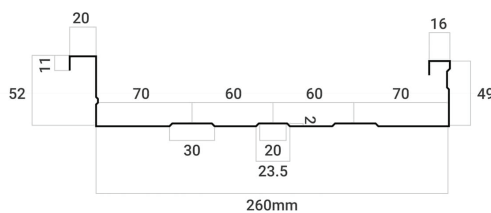

A more economical and efficient steel formwork system due to its wider span and deeper profile.

Its web design saves up to 25% on concrete volume.

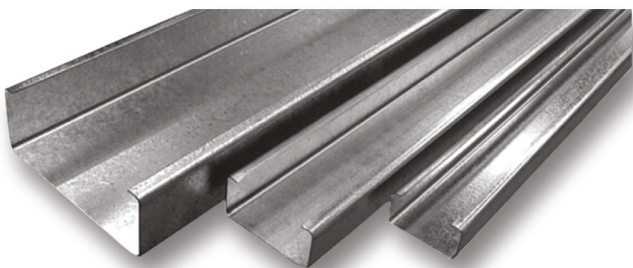

## MAXI FLAT DECK

It's flat soffit design is ideal for exposed ceiling. Design to combine effectively and harmoniously with concrete slab.

## C-PURLINS

C Purlins are horizontal structures that are used to support roof sheeting. Our C Purlins are made from galvanized iron which makes it light weight, High tensile & corrosion resistant.
